**FOR IMMEDIATE RELEASE****Illunis LLC expands distribution channel**

Total Turnkey Solutions in Australia added as distributor of illunis products.

Minnetonka, MN, April 8, 2011 - illunis LLC today announces that Total Turnkey Solutions has become the distributor of illunis camera products in Australia and New Zealand. Total Turnkey Solutions is a leading supplier of state-of-the-art components and systems for image processing, image analysis, and machine vision related applications. Adding Total Turnkey Solutions as our distributor in Australia and New Zealand provides illunis a professional and technical partner to better serve customers in this region.

"We are very excited about the opportunity to work with such a respected and knowledgeable partner in a growing market" says Erik Vermeulen, Director of Sales and Marketing, illunis LLC. "Total Turnkey Solutions brings years of experience and a strong sales team committed to understanding customer needs, then applying the right solution. Working with Total Turnkey Solutions allows us to market our high-resolution cameras in Australia & New Zealand and find those customers who demand the best"

About illunis LLC

Committed to being the world's leading supplier of digital imaging solutions for high performance imaging markets, illunis LLC solves its customers' needs by focusing on developing, manufacturing, and marketing leading edge solid state CCD and CMOS digital cameras for Industrial, Scientific, Military, and Aerial applications. illunis LLC strategy is to identify and market imaging solutions that provide value to OEM partners. illunis LLC was formed in 2000 and is privately owned.

About Total Turnkey Solutions

Total Turnkey Solutions is a world-class scientific/engineering resource, delivering leading edge data acquisition, test and measurement; PC based industrial automation, scientific imaging, industrial machine vision products and systems. Turnkey Solutions combine easy-to-use, device-independent software with state-of-the-art hardware. We give OEM's and integrators the tools they need to reduce time-to-market and decrease development costs.
